

INTELLIGENCE

Open Source Scanning

Scan across the internet for servers, Internet of Things devices and industrial controllers.

Effective

1

Responsible

1

TECHNOLOGY

Brute Force Attack

By automatically trying multiple username and password combinations, it may be possible to access a target system.

Effective

-1

Responsible

1

GOVERNANCE

Questionable Values and Ethics

You carry out your cyber activities with little regard for wider consequences.

Ransomware Attack

Encrypt your target's data,
then demand payment to
release it.

Effective

1

Responsible

-3

TECHNOLOGY

Manipulation of Data

Target individuals and groups rely on data to make decisions. By targeting their storage, transmission and processing of data, it is possible to interfere with decision making.

Effective

1

Responsible

1

TECHNOLOGY

Network Attack

The core routers and switches at the centre of a network can be vulnerable, allowing complete access to the network.

Effective

1

Responsible

1

INTELLIGENCE

Communications Interception

By compromising the servers of target communications providers, it is possible to intercept messages.

Effective

2

Responsible

0

GOVERNANCE

Independent Oversight

Your operation is overseen by the independent office of the Investigatory Powers Commissioner, ensuring your operation meets the UK's commitment to acting responsibly in cyberspace.

Effective

0

Responsible

1

GOVERNANCE

Lack of Oversight

You operate independently, with no oversight from independent democratic bodies.

Effective

0

Responsible

-2

TECHNOLOGY

Backdoor

Backdoors in software allow you to run code or install other software that users are not aware of.

Effective

2

Responsible

0

INTELLIGENCE

Technical Reconnaissance

Covert technical access to a target's network increases understanding, making operations more precise and calibrated.

Effective

2

Responsible

1

INTELLIGENCE

Partners

Working with international and other government partners increases the amount of knowledge available on a target.

Effective

1

Responsible

2

INTELLIGENCE

Partners

Working with international and other government partners increases the amount of knowledge available on a target.

Effective

1

Responsible

2

INTELLIGENCE

Signals Intelligence

Intelligence agencies routinely collect intelligence through the internet to protect national security, detect and prevent serious crime, and preserve economic wellbeing.

Effective
